- Selenium Webdriver and IDE, Playwright
- Basic Java

PROFESSIONAL EXPERIENCE

Software QA Engineer, Coreproc, Inc.

Jan 2025 - Present

- Conducted manual testing for web and application systems using various test case scenarios to ensure product quality
- Performed regression, smoke, and exploratory testing during development and pre-release phases.
- Logged and tracked defects in Jira, verified fixes through re-testing, and conducted API testing to validate backend functionality and endpoint behavior.

Software QA Engineer | Technical Support, Eulap Jul 2023 – Jan 2025

- Provided Level 1 technical support by assisting clients or users with system issues, troubleshooting basic technical problems, and documenting incidents through a ticketing system.
- Conducted manual testing to validate reported issues and ensure system functionality before escalating to higher support levels.
- Performed regression, smoke, and exploratory testing to confirm that fixes and new changes did not affect existing features.
- Logged and tracked defects in Jira and verified resolutions through re-testing before releasing updates to clients.
- Ensured software quality and stability prior to deployment.
